

## What is the District 5160 International Service Committee?

We are a team of Rotarians who are willing to use our expertise and knowledge to help District 5160 Clubs plan successful Global and District grants.

Do you have a special interest or skill that could help Rotarians and Clubs in planning, designing, and implementing a Global or a District grant?

Are you

- An engineer who could help with a water project in South America or a rain-harvesting project in Africa?
- A medical provider or scientist who could help plan and design a cardiac unit in a hospital or a cervical cancer project in a remote village?
- An educator who would like to help equip a school in Mexico?
- An IT specialist who could design a computer lab for a facility in Nigeria?
- A professional or hobbyist with a unique talent or trade who could help to train others?
- A Rotarian who enjoys opportunities to help with unique projects?

If so, we invite you to join the District 5160 International Service Committee. We could use your expertise and knowledge!
